EDUCATION

480 HOURS INTENSIVE THREE MONTHS COURSE | Tuitt Coding Bootcamp, Metro Manila, PH

- Awarded: 2nd Top Performer (Batch 18)

BACHELOR OF SCIENCE IN ELECTRONICS ENGINEER | De La Salle University – Dasmariñas

ABOUT ME

I've never backed down from a challenge and when there is none, I find what's deemed to be "fixed" in the eyes of the norm and break it down to pieces for the sake of effectivity and innovation. From my interest in electronics engineering right down to starting my own made-to-order bakery (Mad Batter), it is evident that my life revolves around breaking borders and trying new things.

Being the driven individual that I am, I took on web development and it has then since piqued my interest—all the complex structures and the "there is no one solution" approach to the wide world of web is something that evolves through time, just like myself. Ever since enrolling in Tuitt, I am now more dedicated in breaking down the walls that have built the standards of web development, hoping to innovate better solutions and ideas that could someday change how it's viewed.
